
Integrated approach to FHB management

**Experiences at Lethbridge and Bow
Island 2014-2017**

Acknowledgements

- **Project funded by ACIDF and AWC**
- **Lethbridge Agronomy Team**
 - **Allan Middleton, Pat Pfiffner, Colin Enns, and Helena Jowkar**
 - **Chris Hietamaa and Marie Schussler**

Methodology

- **Irrigation:** dryland and irrigated
- **Genetics:**
 - CWRS “MS” rating for FHB
 - CWRS “MR” rating for FHB
 - Durum
- **Inoculum:** with and without infected residue
- **Fungicide:** with and without Prosaro

Surface residue post seeding

Genetics

	2014	2015	2016	2017
MS	Lillian	Muchmore	Muchmore	Muchmore
MR	Carberry	Carberry	Carberry	Carberry
Durum	Strongfield	Enterprise	Enterprise	CDC Vivid

2014: Lethbridge only

2015-2017: Lethbridge and Bow Island

Total of 7 site-years

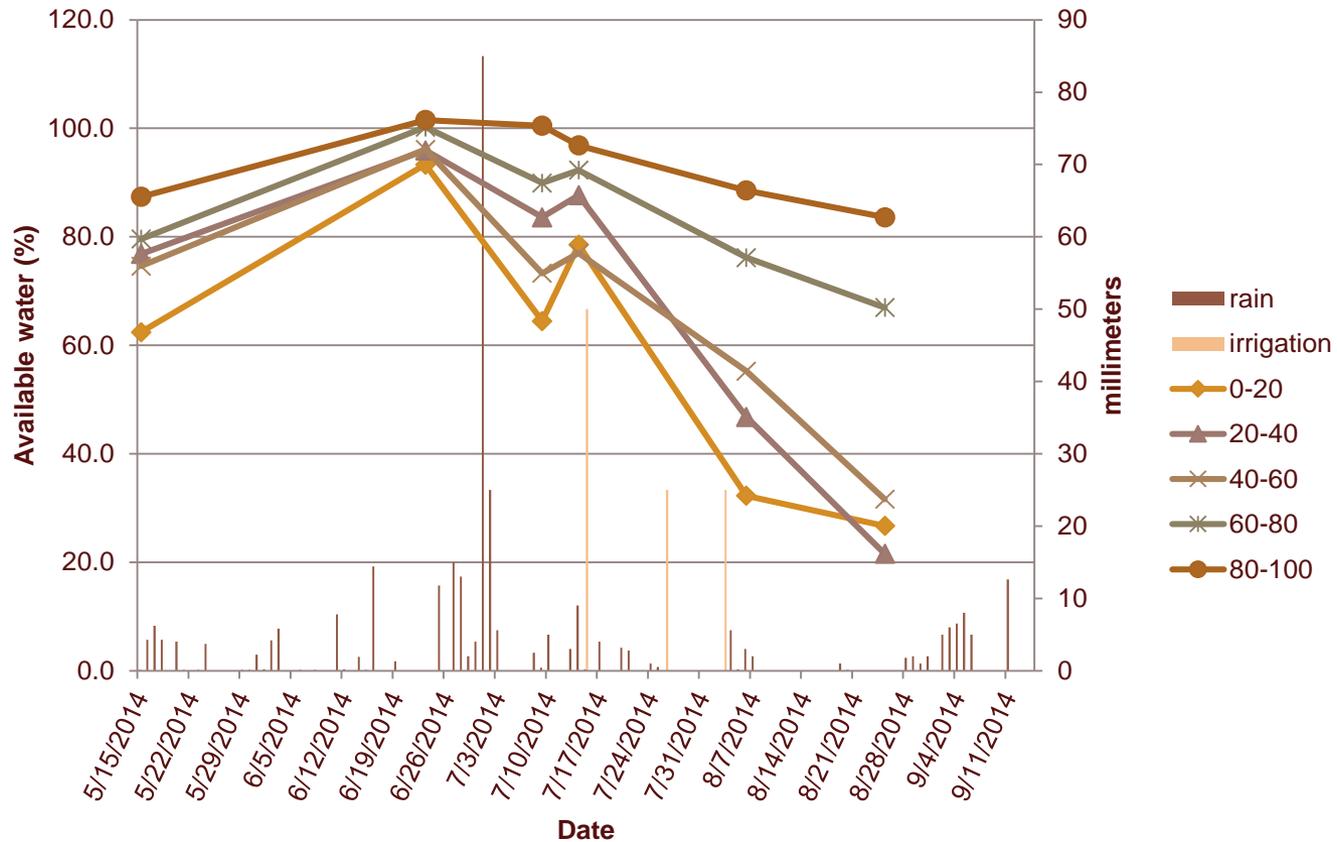

Worst case scenario plots

- **Lethbridge only 2014-2017**
- **Adjacent to main experiment but separate**
- **Durum, on inoculated plots, no Prosaro, irrigated the same as main experiment**
- **Light irrigation daily or twice daily through flowering**

Effect of irrigation on durum FDK and DON levels in 2014

Treatment	FDK (%)	DON (ppm)
Dryland/Inoculated/No Prosaro	1.3	0.9
Irrigated/Inoculated/No Prosaro	1.8	1.8
Irrigated/Inoculated/No Prosaro Worst Case	3.5	3.7

2014 Rainfall, irrigation and available soil moisture

Effect of Irrigation and Prosaro on FDK levels in wheat 2014

Treatment	FDK (%)	Treatment	FDK (%)
Irrigated	0.59 A	Prosaro	0.41 B
Dryland	0.43 B	No Prosaro	0.61 A
Carberry Irrigated	0.38 C	Carberry Prosaro	0.27
Lillian Irrigated	0.37 C	Lillian Prosaro	0.28
Strongfield Irrigated	1.04 A	Strongfield Prosaro	0.69
Carberry Dryland	0.26 C	Carberry No Prosaro	0.37
Lillian Dryland	0.32 C	Lillian No Prosaro	0.41
Strongfield Dryland	0.70 B	Strongfield No Prosaro	1.05

FDK and DON levels in wheat at Lethbridge and Bow Island 2015

		FDK (%)	DON (ppm)
	Carberry	0.03	0.02
Lethbridge	Muchmore	0.05	0.03
	Enterprise	0.05	0.08
	Worst Case	0.29	0.48
	Carberry	0.04	0.00
Bow Island	Muchmore	0.04	0.02
	Enterprise	0.11	0.04

FDK and DON levels in wheat at Lethbridge and Bow Island 2017

		FDK (%)	DON (ppm)
	Carberry	0	0.02
Lethbridge	Muchmore	0	0.01
	Enterprise	0.04	0.03
	Worst Case	0	0.1
	Carberry	0.01	0.04
Bow Island	Muchmore	0.01	0.05
	Enterprise	0.03	0.07

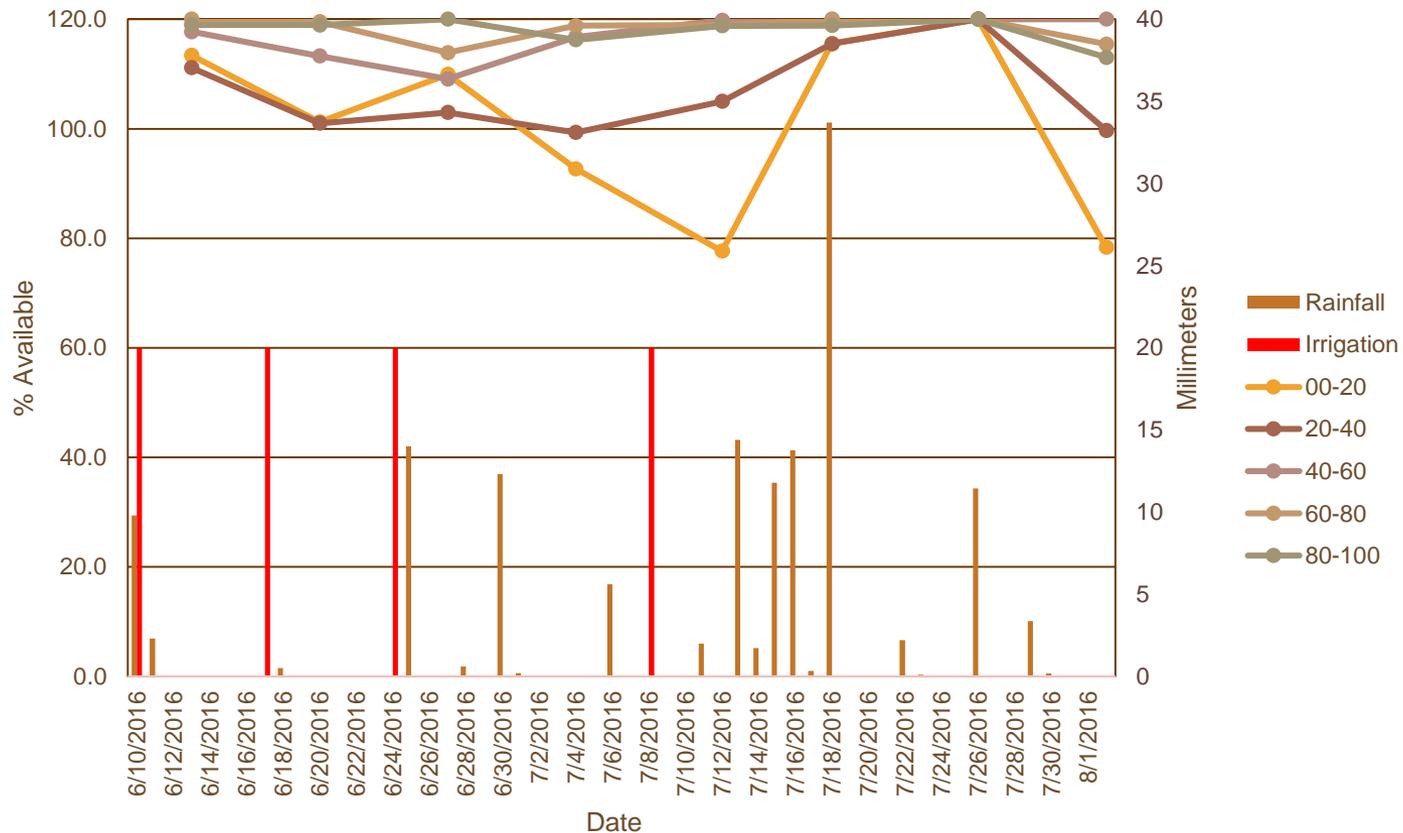

Yield, lodging, protein, FDK & DON in Carberry, Muchmore & Enterprise wheat at Lethbridge & Bow Island 2016

Site	Cultivar	Yield (kg/ha)	Lodging	Protein (%)	FDK (%)	DON (ppm)
	Carberry	3736 C	1.0	12.1 A	1.0	0.10
Lethbridge	Muchmore	4322 B	1.0	11.6 B	1.1	0.16
	Enterprise	4745 A	1.0	11.2 C	1.3	0.12
	Carberry	5410 B	1.8 B	12.9 B	1.1 B	0.10 C
Bow Island	Muchmore	6089 A	1.5 B	12.8 B	1.1 B	0.13 B
	Enterprise	6119 A	6.5A	13.1 A	1.5 A	0.67 A

Irrigation x cultivar x fungicide treatment interaction effect on DON at Bow Island 2016

			DON (ppm)
	Carberry	Prosaro	0.01 B
	Carberry	No Prosaro	0.03 B
Dryland	Muchmore	Prosaro	0.06 B
	Muchmore	No Prosaro	0.09 B
	Enterprise	Prosaro	0.40 A
	Enterprise	No Prosaro	0.34 A
	Carberry	Prosaro	0.05D
	Carberry	No Prosaro	0.15 CD
Irrigated	Muchmore	Prosaro	0.13 CD
	Muchmore	No Prosaro	0.26 C
	Enterprise	Prosaro	0.69 B
	Enterprise	No Prosaro	1.27 A

Rainfall, irrigation and available soil moisture at Bow Island 2016

Summary

- 4 of 7 site years minimal FDK and/or DON
- 3 of 7 site-years with treatment effects or FDK levels that lower grade
- Durum>>>>MS = MR
- Moisture conditions before and after heading affect FHB. Frequency more important than quantity.

Summary

- **Elevated FDK more frequent than elevated DON**
- **Prosaro reduces FDK and DON, but achieving <0.25% FDK on CWRS may not be possible**
